

# The Wire Process Connection

## New Website now online

Wire Process Specialties is pleased to announce our newly re-designed web site. This new web site features a list of our Global Technology Partners and descriptive pages of each partner with brochures and video clips. All video is available on our YouTube channel. Our news page includes our newsletter archive and feed from our twitter account.

Please visit our website and bookmark it for your resource into cost effective technology for processing wire and cable assemblies and much more.

## Follow WPS on Twitter

We are pleased to announce our new twitter feed.

We have great plans to enhance our communication efforts to our valued customers. Our Twitter feed is one part of this effort. New product announcements, links to our newsletters and new video uploads to YouTube will

stream through our Twitter feed.

If you are already on Twitter, point to [twitter.com/wireprocess](https://twitter.com/wireprocess) and sign on to follow us.

## WPS is on YouTube

Please visit our [YouTube channel](#) to view product videos and tutorials. Join our Twitter feed to receive instant notification of new video clips uploaded to YouTube.

## New Schaefer SSM Seal Applicator

Wire Process Specialties is pleased to announce the Schaefer SSM seal applicator. The SSM is designed to apply a weather seal to the end of a wire prior to crimping on an automated wire processing machine.

The SSK is combined with the SSK Seal tooling kit to provide a complete solution for the Schaefer Primo XLT, the Uno and existing machines in operation.

In addition, the SSK seal kit is compatible with the Pawo SLU seal module.

To view information on the [SSM](#), click [here](#) and the SSK, [here](#). More information on Schaefer can be found by visiting [www.wireprocess.com/schaefer.html](http://www.wireprocess.com/schaefer.html)

## 2011 Wire Processing Expo

It is never too early to make plans to attend the 2011 version of the Electrical Wire Processing Technology Expo.

The dates are May 18 and 19.

WPS will be on site as we have since the inaugural 2001 Expo and will be available to show you the current technology available from our Global Technology

Partners.

More on our coverage coming soon.

The Wire Process Expo web site is [www.expoproductionsinc.com/wire\\_home.htm](http://www.expoproductionsinc.com/wire_home.htm)

We will inform you when registration opens.

We hope to see you there!

## WPS National Distributor for Lakes Precision

Lakes Precision, a valued Global Technology Partner to Wire Process Specialties is pleased to announce an extension of our support to our customers in Canada.

Wire Process Specialties can supply your requirements for wire processing machine blades and crimp tooling. WPS has

stocked up on blade designs that are typically used by our customers across Canada.

The goal of our program is to reduce the overall cost of blade supply. Our volume purchases allow us to pass on import cost savings to our customers.

Contact us to receive a listing of

blades that are stocked at WPS.

We can also build programs custom tailored to your annual requirements.

To see how Lakes Precision and WPS can provide critical cost savings to your company, contact Wire Process Specialties.

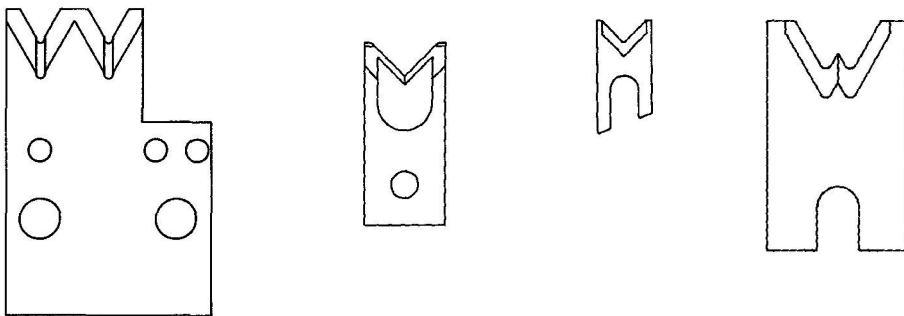

### Quotes from Twitter

"Today's business is measured in inches. Work for and celebrate the small wins" .... and the big wins will take care of themselves!

"If you are treating your products as commodities, are you doing the same with your customers? Treat your products and customers as unique."

**"There are no problems we cannot solve together & very few that we can solve by ourselves"**

Lyndon B Johnson

## Our Vision

To earn the privilege to be our Customer's Natural Choice of a supplier of assembly solutions.

## Our Product Profile

Wire Process Specialties supply processing solutions (components and equipment) for electrical and electronic manufacturing and assembly.

### Wire Processing.

- Measure and cut of wire and tubing.
- Wire Marking and Stripping.
- Crimping Technologies
- Crimp Testing and Validation.
- Heat Shrink Tube Processing.
- Ultrasonic Wire Splicing and wire termination.
- Semi and Full automation of wire and cable harnesses.

### Solar.

- Solar Panel Assembly (Ultrasonic)

### Battery assembly

- Ultrasonic welding of battery cells.

### A/C-HVAC.

- Copper tube sealing (Ultrasonic)

### Transformer and Electric Motors

- Coil Winding Equipment.
- Coil Taping
- Magnet Wire Stripping.
- Ultrasonic welding
- Hairpin Coil winders for Hybrid motors.
