

# Applitek Crimping Dies

# Terminal Crimping Presses

**Precision Tooling**

**Testing**

**Quality**

APP-1700 (LEFT TO RIGHT SIDE FEED)

Note: Always refer to specification sheet for exact part numbers

OPTIONAL: STYLE "D" BRAKE

## M-5000

Crimping capacity to 10 gauge wire.  
 Precision crimp height adjustment  
 Controls include: •Set up mode ( Jog )  
 •Split cycle mode.  
 •Reset able counter.  
 Supplied with Reel arm & Stock guides.  
 Integrated Safety guarding.  
 Simple 110v operation.

## M-4000

Compact and economical.  
 Crimping capacity to 10 gauge wire.  
 Precision crimp height adjustment.  
 Controls include: •Set up ( Jog )  
 •Variable speed control  
 Supplied with Reel arm & Stock guides.  
 Integrated Safety guarding.  
 Simple 110v operation.

## M-3000

Compact and economical.  
 Crimping capacity to 14 gauge wire.  
 Precision crimp height adjustment.  
 Controls include: •Set up ( Jog )  
 •Variable speed control  
 Supplied with Reel arm & Stock guides.  
 Integrated Safety guarding.  
 Simple 110v operation.

**Engineering:** All of our applicators are engineered to the highest standards to achieve maximum performance, tool life and repeatability.

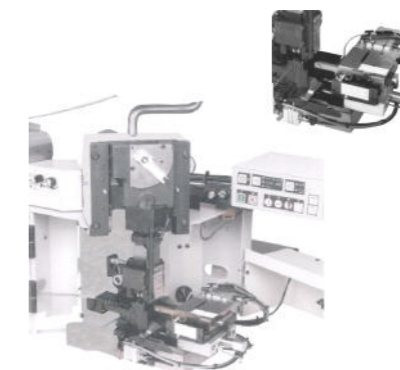

**Quality tool steels:** Only tool steels that conform to industry standards are used in our manufacturing process.

**State of the art manufacturing:** All components are manufactured on site by using a variety of machines including wire EDM, CNC Machining centers, Automatic surface grinders, vertical and horizontal milling, Heat treating ovens and various support equipment.

**Experience:** For over 18 years we have been supplying crimp dies to major manufactures. The versatility of our units has allowed for over 2000 different style terminals to be processed through our side and rear applicators. Crimp forms are designed with our specialized software which incorporates all design criteria such as, heights, widths, compression, pull force etc. Final testing is always preformed with the end user in mind, weather it be manual operation, wire placement or fully automatic operation our units are shipped with out of the box operation. Let us share our experience with you in supplying any of your crimping requirements, special applications, questions or problems. Just give us a call with your needs at 401-467-0007 or e-mail us at [info@applitek-usa.com](mailto:info@applitek-usa.com). You will be happy you did.

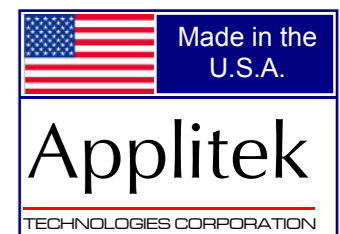

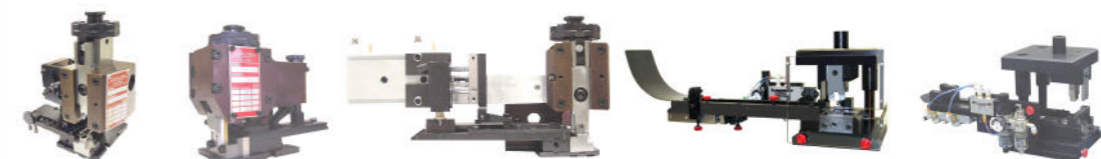

## Strip & Crimp Options available for the M-3000 & M-5000 Crimping Press

Accommodates wire 32-14 AWG  
 Maximum Insulation Diameter .200  
 Strip Lengths : .100-.400  
 Microprocessor Controlled  
 Titanium nitride coated strip blades

3 Modes of operation:  
 Crimp only, Strip only, Strip & crimp  
 Wire sensor: Gold plated contacts with Laser Etched Target.  
 Interlocking Guards  
 Requires 90-100 psi / 6 scfm

**Applitek can supply Crimping Dies for all of your Standard and Non-Standard Crimping Applications**
